

A person wearing a large, olive-green tactical backpack stands with their back to the camera on a grassy bank. They are looking across a calm lake towards a forested shoreline under a twilight sky. A large, dark tree trunk is on the left, and its bare branches hang over the scene. The water reflects the soft light of the sunset or sunrise.

‘SAVOTTA

MADE IN FINLAND – MADE TO ENDURE

"Let's make better than others. Let's make it to endure!" Such words uttered Allan Halme in the year 1955, when he established a company to manufacture rucksacks, satchels and mittens for lumbermen.

Sixty years later already a third Savotta generation proudly carries on the tradition – innovating, developing and challenging themselves. With good spirit and hard work we have managed to create a Savotta culture where careers last dozens of years. From a mere family business, we have grown into a family where we share both success and failure alike. This has created a sturdy foundation for our team spirit and camaraderie.

The first and most important of our values is openness. Integrity is often connected with Finnish mindset and fits our working style, because that's the way we have been working from the beginning. This is why we work in see-through style and answer when questioned. We will not cover up our mistakes but honestly admit them. If such things happen we shall fix it and learn from it. For us responsibility is a sustained way of working and we will hold to it.

We don't support throw-away culture. Our products that last from a generation to generation have been designed on the terms of reliability in harsh environments. The quality of Savotta is a certainty and has been tested in action over half a century by Finnish Defence Forces. Foundations of manufacturing tents and backpacks can be found deep from the military co-operation. Partially because of this our know-how in manufacturing light aluminum backpack frames is outstanding.

Simple, practical and Finnish – this is Savotta. We have come a long road from the beginning. One thing though has always been the same. We still want to make better than others. Let's make it to endure!

**KEY FLAG**

The Finnish Key Flag Symbol helps consumers to choose Finnish made products..

**IMPORTED**

Product with this symbol is not made in Finland.
